Why invest in this ETF?

The CIBC International Equity ETF is an ideal solution for investors looking for enhanced, international diversification with the expertise of professional active management. This ETF provides investors with:

Enhanced diversification

Diversifying a portfolio with international investments improves your risk-return profile while accessing investment opportunities that are not readily available in Canada or the United States.

CINT provides access to the world's best companies outside of the U.S. that offer attractive valuations and prospects for growth.

An unconstrained approach for growth

This ETF is built bottom-up, stock by stock. The sector and geographic allocation is a reflection of the firm's independent judgment.

This unconstrained approach typically leads to a portfolio with little resemblance to any stock market index. The strategy employed to achieve this aim is to buy and hold companies capable of compounding wealth consistently.

Active portfolio management

Benefit from an active portfolio management team with a 30 year history of navigating market cycles.

Combine the expertise of professional portfolio managers with the flexibility and efficiency of an ETF. Active ETFs aim to out-perform their benchmarks and can provide better risk management for your portfolio.
